Webpack	

Experience

Frontend Developer at Publicis Le Pont

October 2023 — March 2025

- Contributed to the development and maintenance of two internal applications (a presentation tool and a content mapper) as a key member of a collaborative, international team.
- Built the product presentation automation tool using **Astro, TypeScript, TailwindCSS and Playwright**, implementing features like custom shape selection that **reduced development time by 25%**.
- Engineered core components and state management logic for the content mapping tool using **React, TypeScript, Zustand, TailwindCSS, shadcn/ui, Zod and Konva.js**, streamlining the creation of annotated product PDFs for the creative team.
- Researched and proposed a scalable data structure for a key feature, ensuring maintainability.
- Implemented the key feature within **5 days of a 2-week sprint**, enabling earlier start for dependent tasks.
- Improved application performance by refactoring a key component to **reduce re-renders by 33% through** optimized state management.
- Enhanced user experience by reducing initial load times through **lazy loading.**

Full-stack Developer Intern at Netoholics, Poznań

July 2019 — August 2019

- Developed and customized e-commerce websites using **WordPress, PHP and WooCommerce**, managing both content and product features.
- Enhanced user experience by implementing interactive features with **JavaScript**.

Frontend Developer Intern at Lakeside Cafe, Bristol

May 2018 — June 2018

- Developed a static company homepage from scratch using **React, JavaScript, CSS Modules and SASS** as part of the Erasmus+ international program.
- Engineered seamless client-side navigation by implementing **React Router.**

Open Source Contributions

Next.js Learn - Vercel

Fixed JSX structure in a skeleton loader by repositioning a div, ensuring proper rendering and improving layout. Pull request #620

Astro.js - withastro

Updated component and variable names in documentation and code snippets post-major version release for consistency and clarity. Pull requests #10277 and #10304

Komorebi - Windows Tiling Manager

Corrected typos in documentation to enhance clarity and readability for users. Pull request #858

javascript.info - Tutorial Website

Translated the "Polyfills and Transpilers" topic to Polish, expanding accessibility for Polish-speaking learners - pending review and merge. Pull request #137

Education

Bachelor of Engineering in Computer Science, University of Lower Silesia, Wrocław

October 2021 — March 2025
